

# Mines and Mining Stocks

## POICHE SPRINGS ANOTHER MERGER

Golden Prince, Gold & Silver  
Prince, Treasure Hill, John  
D. and Monarch Merge.

Another big Poiche merger is on the tapis. This will include the largest properties on the west side of the range between the Prince Consolidated and the Poiche-Demijohn. It will take in the Golden Prince, the Gold & Silver Prince, the Treasure Hill, John D. and Monarch, and as you depart from the claims of E. G. Cox, general manager of Golden Prince and Poiche Double Dike Mining company, Republican county, who was this week elected to the Nevada legislature, came to Salt Lake yesterday to consummate this big mining deal.

"This merger property will have one and a quarter miles on the great Prince dike system, this dike being the mineralizing agency through that part of the district," said Mr. Cox last evening. "All mineral deposits through there seem to emanate from this dike. It is here where the Prince finds his ore bodies, and in fact, the dike from the dike there is a decrease in the mineralization. With over a mile of this dike in our property, we are confident that we have proved it. In fact, work already accomplished on some of these properties to be consolidated has already proved it. In fact, the dike has been proven at both ends, the Prince on one end and the Demijohn near the other."

"On the Gold & Silver Prince shaft down 335 feet from which we have crossed and gone through 160 feet of good milling ore. We cut a number of stringers of high grade ore. For instance, one stringer 20 inches wide averages better than \$100 to the ton."

"They have also received the consolidation company, but the directors will likely be M. A. Low, president; H. P. Clark of Lake, John C. J. Moore of Ogden and G. E. Cox. The details will be worked out within the next few weeks, but the merger is practically assured."

"Things look better in Poiche today than for years," declared Mr. Cox. "And it is only a matter of time before the camp will take on its former prestige and then we will show you that Poiche is still on the map."

## POICHE MINE IS WORKING

Manager M. C. Godbe Returns  
After Sinking of Shaft  
Is Resumed.

After having spent several days in Poiche, where he started work on the Centennial Poiche, which had been idle for some time, Manager Murray C. Godbe returned to Salt Lake yesterday. Work was started on the main shaft, which will be sunk to the ore level and drifts soon.

The time-shaft contact is 520 feet from the collar of the Centennial shaft. The top of the first bed of ore is 520 feet from the collar of the shaft. The shaft is now 490 feet deep, giving 30 feet to sink in the shaft contact and an additional 40 feet to the first bed of ore. All these beds in the Prince bear a fixed relation to each other. The ore bodies are rich in copper and silver, and the ore is of high grade. The face of every drift in the Prince mine and on every level is in ore.

The company has also been mining, approximately 200 acres, immediately adjoining the Prince Consolidated. The Centennial Poiche joins the Prince Consolidated on the south and the shaft is only 1,400 feet from the main working shaft of the Prince. The Centennial shaft is sunk to the ore level and drifts soon. The strike of the Prince system of fissures, the trend of the ore bodies, and the ore is of high grade. The face of every drift in the Prince mine and on every level is in ore.

In referring to the great dike which cuts through this part of the district, Professor Fred J. Pack of the University of Utah says:

"Every good deposit thus far developed has increased in richness as the igneous material (porphyry dike) is approached, both at the surface and in the nature of the ore body itself. With respect to its mineralogical composition, gives proof of igneous activity. The nature of the ore body itself, and the considerable distance, has meant in every case decreased, and finally disappearance of valuable elements. The ore bodies and mine operators have learned that they are very much safer when in close contact with the igneous material. Mr. Godbe reports everything shows more life and activity down there than for a year."

## SILVER PRICES OF THE PAST THREE YEARS

The average price for silver in October was 53.25 cents. This compares with 53.25 cents for the previous month, and is the highest price recorded since April, 1908, when the average was 55.25 cents.

The following table gives the averages for the first ten months of 1910, 1909 and 1908:

	1910	1909	1908
January	52.75	51.50	52.75
February	52.75	51.50	52.75
March	51.45	50.45	52.95
April	53.25	51.45	52.95
May	53.25	51.45	52.95
June	53.25	51.45	52.95
July	53.25	51.45	52.95
August	53.25	51.45	52.95
September	53.25	51.45	52.95
October	55.49	50.93	51.43

## FACE OF GALENA IN UTAH MINES DRIFT

Late word from Big Cottonwood is to the effect that the Utah Mines Coalition company has two feet of fine galena ore, carrying some oxide, in the face of the drift. This is gratifying to the management because a short time ago, after a body of good shipping ore had been followed for about 60 feet, the ore was cut off by a fault. Work was pushed out, and the body was followed, and now the ore body has been picked up again. The property has been producing from 35 to 50 tons of ore a week, but with proper facilities this might be greatly increased.

## ONE AT SAMPLERS

Four carloads of ore from Utah mine, one from Idaho and two from Nevada, were released by the Utah Ore Sampling company yesterday.

## ORES AND BULLION

Smelter settlements yesterday, reported by the Commercial & Finance Co.:  
Ores: \$20,000; bullion, \$100,000.  
Silver was quoted at 52 1/2c; copper, cathodes, 12 1/2c; lead, \$1.40.

## HIGH-CLASS ORE STUCK AT OPHIR

Dry Canyon Mines Company  
Gets Body of \$119 Rock  
in Shaft.

Ore carrying values as high as \$119 was struck this week in the bottom of the 1,000-foot shaft of the Dry Canyon Mines company at Ophir. This is the world brought in from there yesterday by H. P. Eakin, manager. The assay taken out of the lower bottom of the shaft was as follows: Copper, 15 per cent; silver, 6.3 per cent; silver, 12 ounces, gold, \$2.20. The top face of the shaft gave values as follows: Copper, 6.6 per cent; lead, 21.6 per cent; silver, 7.4 ounces; gold, \$1.40. This ore body is about a foot and a half thick. It has a dip of about 10 degrees, and the mountain is found between dolomite lime and siliceous lime. This ore body has a vertical depth of about 200 feet on the vein. The ore is in the Dry Canyon mine makes out into the lime in almost flat blanket form and again changes to steep pitch.

The company is shipping about a car a month of the high-class stuff. The last car netted \$12 a ton. Mr. Eakin says a number of the properties in the district are shipping and things generally in the camp are in a flourishing condition.

## COPPER DEALERS ARE BUYING OLD SCRAP

Copper is stronger. Lake is now 13 to 13 1/2 cents, and electrolytic is 13 cents a pound. Sales of lake as high as 13 1/2 cents for January delivery are reported. Foreign consumers continue to buy copper quite freely in this country. Evidently requirements for the bulk of this year have been quite fully supplied, and domestic consumers are now bidding for January and February delivery. The many producers are refusing to sell for less than 13 1/2 cents, says G. L. Walker.

During October the foreign visible supply of copper decreased 12,047,360 pounds. Figures so far received indicate that exports from this country for the month of October were 10,000,000 pounds, as compared with September, which was the banner export month of the year. It is estimated that the Copper Producers' statement, which will be issued next Monday, will show a decrease of over 10,000,000 pounds in domestic deliveries. It is not improbable, therefore, that there was a further shrinkage in the world's copper surplus during October.

The wire business, which has been dull for a year or more past, is now showing a considerable improvement. Brass manufacturers continue to buy wire, and a resumption of buying of sheet copper is at a new high record mark. Brokers report unusual activity in the metal market. Dealers are buying and collecting all the old copper, brass and composition they can find, and they are able to dispose of it readily at a fair price.

## COPPER BUYING ON LARGE SCALE

There has been a resumption of copper buying on a fairly large scale, a movement not generally expected by the trade. The buying movement, which resulted in the purchase of something like 200,000,000 pounds of copper culminated toward the latter part of last month, and a resumption of buying was not anticipated until December.

Consumers have now made their purchases for a year or more past, and delivery in January, 1911, and sales this week aggregate a total of close to 50,000,000 pounds. The market for copper is understood to have sold since the first of the month close to 20,000,000 pounds, mostly for two months' production on a basis of 13 cents a pound.

Since the first of last month it is estimated that there have been sold approximately 250,000,000 pounds of copper, which is equivalent to more than two months' production of the refineries of this country.—News Bureau.

## KNIGHTS ASSESS BECK AND TREASURE HILL

Provo, Nov. 10.—Directors' meetings of several of the Knight companies were held here today. No dividends were declared, but two assessments were imposed.

One cent against Beck Tunnel stock, and one cent against Utah Treasure Hill. Encouraging reports were made from the Beck Tunnel and Treasure Hill. The cave in Iron Blossom was mentioned, the recent strike on the level of the Beck Tunnel, and the fact that the 1,000-foot level of Beck Jack. Conditions generally in all these fields were reported very favorable.

## WILBERT OF IDAHO A PROMISING PROPERTY

That there is between \$100,000 and \$200,000 in ore in sight in the Wilbert Mining company ground in the Little Lost River country in Idaho, is the opinion of M. M. Johnson, mining engineer, who has returned from an inspection of the property at the request of President A. S. Ross and Secretary H. Knight. The property is 25 miles from Arco on the Mackay branch. When the ore had to be hauled 80 miles by horse and wagon, the property was sold to the Wilbert. There are between 3,000 and 4,000 feet of workings on the property, Mr. Johnson thinks this will some day become a big producer.

## HEAVY SELLING IN NEW YORK MARKET

(By Badger Bros. Private Wire.)  
New York, Nov. 10.—In today's stock market another heavy selling movement occurred in the leading issues, and which was regarded as being the long holdings of several large plungers who anticipated a higher market as the result of Tuesday's election, but were disappointed. Manipulation of this break in values was planned by certain inside interests to clean up the speculative situation here and give the market greater stability. The steel tonnage report was about as looked for, with the books now showing about 2,500,000 tons unfilled orders. The report is not bearish in view of coming of this industry. We look favorably to the long side of stocks now and believe they should be bought on any recessions.—E. F. Hutton & Co.

The want ads can serve you only if you use them.

## POICHE CON.'S LAST BREATH

Makes Final Distribution of  
\$470,000 This Week and  
There Is No More.

With the final payment being made this week of the original purchase price of \$470,000, the Poiche Consolidated Mining & Reduction company winds up its business and passes into history, and in its place looms up big and promising the Consolidated Poiche Mines company, taking in not only the old Poiche Consolidated, but much of the Ohio-Kentucky and the Nevada-Utah's most productive territory.

The Poiche Consolidated was organized nearly thirty years ago, and was the first great merger proposition in the famous old camp. It took in such properties as the Dry Canyon, Poiche, Ely, Meadow Valley and other well known properties located over in the Day district and in the Nevada-Utah territory. It embraced some fifty claims, covering the richest territory in the district, and was valued at the enormous sum of \$2,000,000.

Things went on swimmingly with the old Poiche Consolidated while silver was high, and the stock market was hot, but when it dropped to 84 cents or less the company began to lose ground. The Poiche Consolidated was sold to the Nevada-Utah, which took an option on the property. In 1907 the new company secured debt payment of the Poiche Consolidated stockholders. As Mr. Osborne puts it:

"This winds up the old Poiche Consolidated, and in its shoes now stands the reorganized Nevada-Utah and the Consolidated Poiche Mines company. Mr. Woolley, the new president of the Nevada-Utah, was assisted at the amount of milling and high-class ore he found in sight on his recent visit to the property, and when he hurried inspection and when about to start east declared that he would start an active development campaign at once on the property."

The principal workings is a three-compartment shaft down to the 500 level, and from there the 1,100 level is a two-compartment. It is understood that by sinking this shaft another 100 feet they have reached the lower level of the workings in the famous black ore body, where 2125 to 1550 ore was taken out in the old work. The shaft is now being sunk and drifting to the ore body should be accomplished in from 90 to 120 days. An ore body 1,700 feet deep and 1,500 feet long has been proven.

## Mine Well Equipped

The property is well equipped for an active campaign. It has its own railroad from the town to the mine, a narrow gauge, and necessary machinery to handle its immense tonnage of low-grade ore. The various dumps and bays of copper ore are being worked, and the property will now be extracted.

At present three shafts are at work in the main part of the mine, and drifts in ore are being out to the west, northwest and east. The property generally is reported to be in first-class condition for developments a big sale.

Black Jack, 1,000 at 16c.  
Iron Blossom, 200 at 75c; 100 at 78c.  
Meadow Valley, 500 at 85c; 1,000 at 85c; 2,500 at 85c.  
May Day, 5,000 at 85c.  
New York, 1,000 at 24c.  
Plutus, 1,000 at 25c.  
Western Nevada, 1,000 at 25c.  
Shares sold, \$3,404.87.

## United States Company Taking Over Rainbow Mine in Idaho.

Quietly and methodically the United States Smelting and Refining company is taking over the Rainbow mine in Idaho. Various mining camps where ore is necessary to their smelters may be found and taking leases on properties with large quantities of ore. The interests of their great plants. It is understood that they have men watching every drift for over a million dollars. Speaking of this deal, the Baker City Herald says:

"Under the conditions of the bond, the company giving the bond has four months in which to make an examination of the property, and if the examination is satisfactory and they desire to take over the mine at that time, a cash payment of \$250,000 in gold or in stamps on high-grade ore, and a large amount of gold is being taken out each month. It is said that there is more than a million in gold ore in sight at the present time."

## NOTES AND PERSONALS

A. E. Law of Eureka was in town yesterday showing some fine gold rock from his property.

Joseph H. Hutchinson and P. F. Carney of Goldfield, Nev., were in town yesterday.

B. N. Lehman, manager of Yankee Copper, has gone east on business connected with the company.

Colin McIntosh, formerly of the Ohio Copper, has returned from Idaho.

H. J. Allen and Charles Swanson of Wood River, Idaho, are in the city arranging for ore shipment.

W. A. Ekman, of Black Metal Mining company, Nevada, is in town, having brought in a carload of ore from the property near Battle Mountain.

## LETCHFIELD & BARSTOW

The Tilt and Mantel Men.  
Mantel sets complete, \$25 and up.  
46 So. State St.

## Sioux Con., Uncle Sam, Lower Mammoth, Ohio Copper Most Active.

Yesterday's market showed considerable improvement over that of the previous day. Prices held rather firm, but the demand was not up to the average. Colorado opened at 42 1/2 and closed at 40 1/2. But slight demand. Iron Blossom sold at 78c and 79c. Uncle Sam opened at 47 1/2 and closed at 48c. But slight demand. Ohio Copper was 40c. But slight demand. Black Jack sold at 16 1/2 and 17c. Lower Mammoth came in in the morning with sales of 4,000 shares. Ohio Copper was 40c. But slight demand. Iron Blossom sold at 78c and 79c. Uncle Sam opened at 47 1/2 and closed at 48c. But slight demand. Ohio Copper was 40c. But slight demand. Black Jack sold at 16 1/2 and 17c. Lower Mammoth came in in the morning with sales of 4,000 shares. Ohio Copper was 40c. But slight demand. Iron Blossom sold at 78c and 79c. Uncle Sam opened at 47 1/2 and closed at 48c. But slight demand. Ohio Copper was 40c. But slight demand. Black Jack sold at 16 1/2 and 17c. Lower Mammoth came in in the morning with sales of 4,000 shares. Ohio Copper was 40c. But slight demand. Iron Blossom sold at 78c and 79c. Uncle Sam opened at 47 1/2 and closed at 48c. But slight demand. Ohio Copper was 40c. But slight demand. Black Jack sold at 16 1/2 and 17c. Lower Mammoth came in in the morning with sales of 4,000 shares. Ohio Copper was 40c. But slight demand. Iron Blossom sold at 78c and 79c. Uncle Sam opened at 47 1/2 and closed at 48c. But slight demand. Ohio Copper was 40c. But slight demand. Black Jack sold at 16 1/2 and 17c. Lower Mammoth came in in the morning with sales of 4,000 shares. Ohio Copper was 40c. But slight demand. Iron Blossom sold at 78c and 79c. Uncle Sam opened at 47 1/2 and closed at 48c. But slight demand. Ohio Copper was 40c. But slight demand. Black Jack sold at 16 1/2 and 17c. Lower Mammoth came in in the morning with sales of 4,000 shares. Ohio Copper was 40c. But slight demand. Iron Blossom sold at 78c and 79c. Uncle Sam opened at 47 1/2 and closed at 48c. But slight demand. Ohio Copper was 40c. But slight demand. Black Jack sold at 16 1/2 and 17c. Lower Mammoth came in in the morning with sales of 4,000 shares. Ohio Copper was 40c. But slight demand. Iron Blossom sold at 78c and 79c. Uncle Sam opened at 47 1/2 and closed at 48c. But slight demand. Ohio Copper was 40c. But slight demand. Black Jack sold at 16 1/2 and 17c. Lower Mammoth came in in the morning with sales of 4,000 shares. Ohio Copper was 40c. But slight demand. Iron Blossom sold at 78c and 79c. Uncle Sam opened at 47 1/2 and closed at 48c. But slight demand. Ohio Copper was 40c. But slight demand. Black Jack sold at 16 1/2 and 17c. Lower Mammoth came in in the morning with sales of 4,000 shares. Ohio Copper was 40c. But slight demand. Iron Blossom sold at 78c and 79c. Uncle Sam opened at 47 1/2 and closed at 48c. But slight demand. Ohio Copper was 40c. But slight demand. Black Jack sold at 16 1/2 and 17c. Lower Mammoth came in in the morning with sales of 4,000 shares. Ohio Copper was 40c. But slight demand. Iron Blossom sold at 78c and 79c. Uncle Sam opened at 47 1/2 and closed at 48c. But slight demand. Ohio Copper was 40c. But slight demand. Black Jack sold at 16 1/2 and 17c. Lower Mammoth came in in the morning with sales of 4,000 shares. Ohio Copper was 40c. But slight demand. Iron Blossom sold at 78c and 79c. Uncle Sam opened at 47 1/2 and closed at 48c. But slight demand. Ohio Copper was 40c. But slight demand. Black Jack sold at 16 1/2 and 17c. Lower Mammoth came in in the morning with sales of 4,000 shares. Ohio Copper was 40c. But slight demand. Iron Blossom sold at 78c and 79c. Uncle Sam opened at 47 1/2 and closed at 48c. But slight demand. Ohio Copper was 40c. But slight demand. Black Jack sold at 16 1/2 and 17c. Lower Mammoth came in in the morning with sales of 4,000 shares. Ohio Copper was 40c. But slight demand. Iron Blossom sold at 78c and 79c. Uncle Sam opened at 47 1/2 and closed at 48c. But slight demand. Ohio Copper was 40c. But slight demand. Black Jack sold at 16 1/2 and 17c. Lower Mammoth came in in the morning with sales of 4,000 shares. Ohio Copper was 40c. But slight demand. Iron Blossom sold at 78c and 79c. Uncle Sam opened at 47 1/2 and closed at 48c. But slight demand. Ohio Copper was 40c. But slight demand. Black Jack sold at 16 1/2 and 17c. Lower Mammoth came in in the morning with sales of 4,000 shares. Ohio Copper was 40c. But slight demand. Iron Blossom sold at 78c and 79c. Uncle Sam opened at 47 1/2 and closed at 48c. But slight demand. Ohio Copper was 40c. But slight demand. Black Jack sold at 16 1/2 and 17c. Lower Mammoth came in in the morning with sales of 4,000 shares. Ohio Copper was 40c. But slight demand. Iron Blossom sold at 78c and 79c. Uncle Sam opened at 47 1/2 and closed at 48c. But slight demand. Ohio Copper was 40c. But slight demand. Black Jack sold at 16 1/2 and 17c. Lower Mammoth came in in the morning with sales of 4,000 shares. Ohio Copper was 40c. But slight demand. Iron Blossom sold at 78c and 79c. Uncle Sam opened at 47 1/2 and closed at 48c. But slight demand. Ohio Copper was 40c. But slight demand. Black Jack sold at 16 1/2 and 17c. Lower Mammoth came in in the morning with sales of 4,000 shares. Ohio Copper was 40c. But slight demand. Iron Blossom sold at 78c and 79c. Uncle Sam opened at 47 1/2 and closed at 48c. But slight demand. Ohio Copper was 40c. But slight demand. Black Jack sold at 16 1/2 and 17c. Lower Mammoth came in in the morning with sales of 4,000 shares. Ohio Copper was 40c. But slight demand. Iron Blossom sold at 78c and 79c. Uncle Sam opened at 47 1/2 and closed at 48c. But slight demand. Ohio Copper was 40c. But slight demand. Black Jack sold at 16 1/2 and 17c. Lower Mammoth came in in the morning with sales of 4,000 shares. Ohio Copper was 40c. But slight demand.
